## PERSONAL PROJECTS

### Messenger Clone (12/2022 - 02/2023)

- In **Next.js**, **App Router** is used for efficient routing and dynamic page rendering.
- **React** is used to create different reusable components.
- Modern and efficient designs created using **Tailwind CSS** and **Headless UI**.
- In backend, robustness of **Prisma** and flexibility of **MongoDB** is used to create efficient and scalable database.
- **Next-Auth** is used to manage User Authentication protect sensitive data.
- **Social login** is also enabled in it from Google and Github. **Pusher** is used for realtime messaging and notification.
- **Cloudinary** is used for image upload.
- **React-Hook-Form** is used for efficient form handling ensuring that user input is managed seamlessly throughout the application.
- [LIVE DEMO](#)
- [GITHUB REPO](#)

### Track My Expense (09/2022 - 10/2022)

- Created a simple Expense tracker website using **React.js**, which can add and delete our expenses and also can display total amount.
- [LIVE DEMO](#)
- [GITHUB REPO](#)

### Ecommerce Dashboard & CMS (06/2023 - Present)

- Both frontend and dashboard is built using App Router in **Next.js13**
- **Shadcn/ui** and **Radix/ui** is used in dashboard, and **Tailwind CSS** is used for styling throughout website.
- For database, **Mysql**, **PlanetScale** and **Prisma** is used.
- Social login is enabled using **Clerk**.
- **Cloudinary** is used for image upload.
- [GITHUB REPO](#)
